Upgrade your high-traffic washrooms with this stainless steel wall-hung urinal, perfect for schools, offices, factories, sports facilities, and more. The satin-polished, non-reflective surface offers a modern and clean appearance. Manufactured in the UK from durable 1.2mm grade 304 austenitic stainless steel, our wall-hung urinals feature fully boxed two-layered safety ends and front lip, eliminating narrow single sheet edges and potential dirt traps commonly found on lower-quality folded products.

This model wall hung urinal is supplied as a complete pack, including a white plastic WRAS-approved automatic flushing cistern, stainless steel downpipe, and a sparge pipe situated below an integral valance. The package also includes a 2" domed plastic urinal waste, accommodating the preference for 50mm urinal waste pipes with many installers. An optional reducer to 40mm is also available.

Our quick-delivery wall hung urinals come with a top inlet and the option of a left or right drain outlet. Our made-to-order range offers various options, including back inlet with concealed cistern, "L" shape configurations, multiple units with joining strips, and bespoke sizes.
