

WASH TROUGH

WALL MOUNTED - GLASS-FIBRE REINFORCED POLYMER

MODEL
GW-GRPT

Gentworks

- Available in Three Lengths
- White or special order Granite Finish
- Tap Ledge for Deck Mounted Taps
- Supplied Without Tap Holes
- Lightweight and Extremely Durable
- Includes Wall Fixing Brackets
- Smooth Gel-Coat Finish
- Central 2" BSP Waste

The Gentworks GRP range of wash troughs are manufactured in the UK from Glass-Fibre Reinforced Polyester Resin with a smooth gel-coat finish that is resistant to staining. Its smooth design enables easy cleaning without the requirement for strong cleaning products. The Wash Trough is designed to be wall mounted making it simple and quick to install. Taps can be fitted in the tap ledge or for more stylish look wall taps can be used.

These wash troughs maximise the amount of available space, they are easier to keep clean and more hardwearing than conventional vanity units that incorporate basins.

Sample specification Text
